

1984 Coal Mining Annual Index (Vol. 21)

A

AMC Coal Show preview, April 41
 AMC exhibits review, August 38
 Acid rain and forest decline (Comment), November 7
 Advantages of inhole motor drilling, The, November 44
 Automatic roof bolting moves closer to reality, June 49

B

Big dragline moves Appalachian mountains, May 25
 Blast casting in a sensitive environment, July 33
 Bolt tightening method reduces costs and downtime, July 52

C

Carr, Frederick
 —How to eliminate roof and floor failures with yield pillars, December 62
 Case for underground diesels, The, May 48
 Case study: United Coal takes a stepped approach to automation, December 73
 Charity begins at home (Comment), December 9
 Choosing the best GIS software, August 64
 Choosing the right fastener, June 30
 CLEC: Hidden agenda, hidden danger, April 105
 Coal and environmentalism (NCA Hotwire), January 25
 Coal preparation conference and exhibition guide, March S-1
 Conducting negotiations: Costing out the UMW contract, October 44
 Consol's Bailey project takes shape, January 32
 Copulos, Milton R.
 —CLEC: Hidden agenda, hidden danger, April 105
 Costantino, Joseph P.
 —Case for underground diesels, The, May 48
 Critical issues in project financings, May 44

D

Data processing moves into the shop, June 38
 Day acid rain died, The (Focus), April 21
 Deader than a doornail (Focus), September 24
 Deems, James A.
 —Extending longwall faces beyond 600 feet, August 58
 Derrick, James W.
 —Multifed screen increases recovery in fine circuits, September 48

Determining the cost of a system, March 68
 Developing software in-house: Do's and don'ts, September 64
 Dewatering refuse brings profits to Dorchester Coal, September 53
 Dilemma of Canadian power imports, The, (NCA Hotwire), April 36
 Donets Basin leads the way in Russian coal production, The, April 116
 Dumbaugh, George D.
 —Getting coal to go with the flow, January 40

E

Energy security: The free market solution (Focus), March 22
 Erhart, Pamela P.
 —Midwest reclamation methods combat soil compaction, April 88
 —Water jet-assisted cutting nears commercialization, December 55
 Exhibition in print, April 48
 Extending longwall faces beyond 600 feet, August 58

F

Falkenberg, Kathy
 —Reclaiming western mines for wildlife, March 59
 Falkirk's scrapers take a bite out of costs, August 32
 Finding the economic limit of fine coal cleaning, September 38
 Fraud in the acid rain debate (NCA Hotwire), June 27
 From bid to purchase: What the customer wants, October 34
 Future isn't what it used to be, The, (NCA Hotwire), February 29

G

Getting coal to go with the flow, January 40
 Green Brigade marches South, The, (NCA Hotwire), August 9
 Griffin, James M.
 —Critical issues in project financings, May 44
 Guccione, Eugene
 —Skilled people fuel Energy Supply's growth, July 27
 —Why all the fuss about fluidized bed combustion, August 27

H

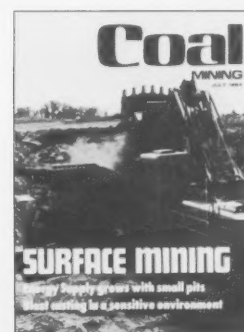

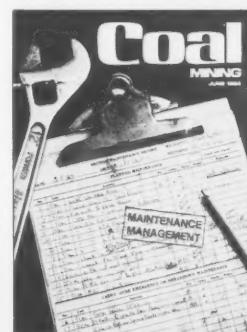

Hansen, Roger E.
 —Bolt tightening method reduces costs and downtime, July 52
 —Choosing the right fastener, June 30
 Hawkins, Gordon P.
 —How crawler track-mounted conveyors improve bulk handling's economics, November 26
 Hescox, Mitchell C.
 —Improving dust return techniques at coal handling facilities, November 31
 High angle conveyors climb to the top, November 39
 Hill, John R.M.
 —Automatic roof bolting moves closer to reality, June 49
 How a data base manager improves a geological information system, November 50
 How crawler track-mounted conveyors improve bulk handling's economics, November 26
 How Jimmy Carter fooled the Arabs (Focus), November 19
 How to develop a program for your prep plant, June 43
 How to eliminate roof and floor failures with yield pillars, December 62
 How will the recession end? (Part 2) (Comment), January 7
 How will recession end? (Part 3) (Comment), February 9
 How will recession end? (Part 4) (Comment), March 9
 How will recession end? (Part 5) (Comment), April 10
 How will the recession end? (Part 6) (Comment), May 7

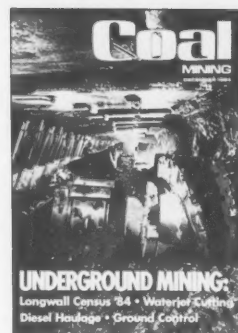

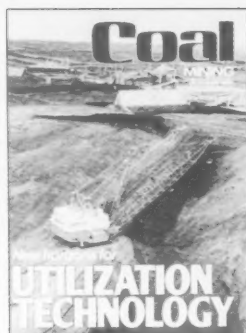

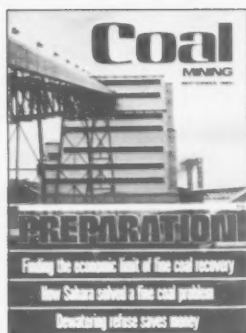

I

Imberman, Woodruff
 —Productivity improvement: Succeeding through the workforce, March 72
 Improved sprayfans provide ventilation solutions, April 94
 Improving dust return techniques at coal handling facilities, November 31
 International Coal Show program, April 44
 Inventory of coal utilization technology, October 24

J

Johnson, F. Thomas
 —Solutions for silo asymmetrical flow problems, January 36
 Johnston, D.R.
 —Video imagery maps surface mine vegetation, July 38

K

- Kemp, Kenneth A.
—An overview of process monitoring and control concepts, July 48
Kravits, Stephen J.
—Advantages of inhole motor drilling, The, November . . . 44

L

- Lawson, Joseph W.R.
—Conducting negotiations: Costing out the UMW contract, October 44
—Preparing for 1984 UMW negotiations, January . . . 51
—Preparing for 1984 UMW negotiations, March . . . 64
Legislative highlights of 1984 (NCA Hotwire),
December 27
Let's un-complicate management (Management),
November 82
Lindsey, Jefferson F.
—SIU's dragline training program simulates the real thing, September 62
Long-term outlook, The, February 46
Longwall census '84, December 39
Loy, Michael D.
—Case study: United Coal takes a stepped approach to automation, December 73
—Choosing the best GIS software, August 64
—Determining the cost of a system, March 68
—Developing software in-house: Do's and don'ts, September 64
—How a data base manager improves a geological information system, November 50
—Microcomputers in mining: How to select the most useful system, January 53
—Where to get more computer information, April . . . 125

M

- MSHA streamlines equipment approval and certification, May 32
Malhotra, Ramesh
—Long-term outlook, The, February 46
Manalapan increases production to 1,500 tons per shift,
December 30
Mason, Richard H.
—Big dragline moves Appalachian mountains, May . . . 25
—Manalapan increases production to 1,500 tons per shift, December 30
Microcomputers in mining: How to select the most useful system, January 53
Midwest reclamation methods combat soil compaction,
April 88
Mid-year assessment, A, (NCA Hotwire), July 24
Mitchell, James J.
—High angle conveyors climb to the top, November . . . 39
Morgan, Michael
—Dewatering refuse brings profits to Dorchester Coal, September 53
Multifed screen increases recovery in fine circuits,
September 48

N

- New cleaning technologies advance coal, May** 38
New cleaning technologies advance coal, June 54
New technology abounds at AMC Show, August 36
Nickeson, Floyd H.
—Vegetative cover grows directly on acidic mine refuse pile, February 39
Nexon, Gerry
—Finding the economic limit of fine coal cleaning, September 38

O

- Onursal, Bekir
—New cleaning technologies advance coal, May 38
—New cleaning technologies advance coal, June 54
Overview of process monitoring and control concepts, An,
July 42

P

- Peace and prosperity through world trade (Comment),**
October 7
Pine Branch recovers augered coal cleanly, April 102
Portable ventilation hood reduces problems of vehicle battery charging, September 59
Preparation/Processing
—Dewatering refuse brings profits to Dorchester Coal, September 53
—Finding the economic limit of fine coal cleaning, September 38
—From bid to purchase: What the customer wants, October 34
—Getting coal to go with the flow, January 40
—High angle conveyors climb to the top, November . . . 39
—How crawler track-mounted conveyors improve bulk handling's economics, November 26
—How to develop a program for your prep plant, June . . . 43
—Improving dust return techniques at coal handling facilities, November 31
—Inventory of coal utilization technology, October . . . 24
—Multifed screen increases recovery in fine circuits, September 48
—New cleaning technologies advance coal, May 38
—New cleaning technologies advance coal, June 54
—Overview of process monitoring and control concepts, An, July 42
—Sahara Coal: The fine art of collecting fines for profit, September 43
—Solutions for silo asymmetrical flow problems, January . . 36
—Washability data at a glance, August 52
—Why all the fuss about fluidized bed combustion, August 27
Preparing for 1984 UMW negotiations, January 51
Preparing for 1984 UMW negotiations, March 64
Productivity improvement: Succeeding through the workforce,
March 72
Pundari, Nat. B.
—From bid to purchase: What the customer wants, October 34

R

- Railroads score, but the game isn't over, (NCA Hotwire),**
September 33
Railroads want it all, (NCA Hotwire), March 31
Rational approach to acid rain, A, (Comment), June . . . 9
Reclaiming western mines for wildlife, March 59
Reeves, Robert
—Washability data at a glance, August 52
Requiem for British coal, (Comment), July 7
Research allays longwall dust, February 48
Ruggieri, Steven K.
—Improved sprays provide ventilation solutions, April . . 94
Rumors: A corporate communication crisis (Management),
August 24

S

- Sahara Coal: The fine art of collecting fines for profit,**
September 43
Sandy overburden presents special stripping problems,
October 40
Schreckengost, Don
—Sahara Coal: The fine art of collecting fines for profit, September 43
Scott, Frank E.
—Consol's Bailey project takes shape, January 32
—MSHA streamlines equipment approval and reclamation, May 32
—Research allays longwall dust, February 48
SIU's dragline training program simulates the real thing,
September 62
Sixth annual directory of new technology, February . . . 30
Skilled people fuel Energy Supply's growth, July 27
Smiley, Carl H.
—Data processing moves into the shop, June 38
Solutions for silo asymmetrical flow problems, January . . 36
Sprouls, Mark W.
—AMC Coal Show preview, April 41
—Longwall census '84, December 39
—New technology abounds at AMC Show, August 36
—Sandy overburden presents special stripping problems, October 40

- Stach, Greg J.
—Blast casting in a sensitive environment, July 33
Studies find more alternatives to soil cover, February . . . 42
Surface Mining
—Big dragline moves Appalachian mountains, May . . . 25
—Blast casting in a sensitive environment, July 33
—Case study: United Coal takes a stepped approach to automation, December 73
—Choosing the best GIS software, August 64
—Determining the cost of a system, March 68
—Developing software in-house: Do's and don'ts, September 64
—Falkirk's scrapers take a bite out of costs, August . . . 32
—How a data base manager improves a geological information system, November 50
—Microcomputers in mining: How to select the most useful system, January 53
—Midwest reclamation methods combat soil compaction, April 88
—Pine Branch recovers augered coal cleanly, April 102
—Reclaiming western mines for wildlife, March 59
—Sandy overburden presents special stripping problems, October 40
—SIU's dragline training program simulates the real thing, September 62
—Skilled people fuel Energy Supply's growth, July . . . 27
—Studies find more alternatives to soil cover, February . . . 42
—Vegetative cover grows directly on acidic mine refuse pile, February 39
—Video imagery maps surface mine vegetation, July . . . 38
—Where to get more computer information, April . . . 125
Survival in the 1980s (Comment), September 9
Suspension system keeps mobile radio working, September 67
Supt, Clyde W.
—How to develop a program for your prep plant, June . . . 43

T

- Three cheers for Court's ICC decision (NCA Hotwire),**
November 25
Timko, Robert J.
—Portable ventilation hood reduces problems of vehicle battery charging, September 59

U

- Underground Mining**
—Advantages of inhole motor drilling, The, November . . 44
—Automatic roof bolting moves closer to reality, June . . 49
—Case for underground diesels, The, May 48
—Consol's Bailey project takes shape, January 32
—Donets Basin leads the way in Russian coal production, The, April 116
—Extending longwall faces beyond 600 feet, August . . . 58
—How to eliminate roof and floor failures with yield pillars, December 62
—Improved sprays provide ventilation solutions, April . . 94
—Longwall census '84, December 39
—MSHA streamlines equipment approval and reclamation, May 32
—Manalapan increased production to 1,500 tons per shift, December 30
—Portable ventilation hood reduces problems of vehicle battery charging, September 59
—Research allays longwall dust, February 48
—Water jet-assisted cutting nears commercialization, December 55

V

- Vegetative cover grows directly on acidic mine refuse pile,**
February 39
Video imagery maps surface mine vegetation, July 38

W

- Washability data at a glance, August** 52
Water jet-assisted cutting nears commercialization,
December 55
What now after the Linowes Report? (NCA Hotwire),
May 21
—Where to get more computer information, April . . . 125
—Why all the fuss about fluidized bed combustion, August . 27
Will the Northeast become a coal-free zone, (NCA Hotwire), October 21
